Reference for Paul Marshall

Paul Marshall has been a valued member of the Fire Protocol Upgrade Team for Tube Lines on the upgrade of the Jubilee, Northern and Piccadilly Lines of the London Underground. The Fire Protocol Upgrade project consists of upgrading the fire alarm, voice alarm and battery inverter systems for 58 Underground stations to meet the specifications set out in British Standards and the Tube Lines Project Specifications for Fire.

Mr. Marshall has served as the Contracts and Procurement Agent for the team. He was responsible for maintaining effective business relationships with the contractors through tracking project instructions issued to the contractors, the associated quantities of works done and the review of the payment applications. He also participated in the tendering and contract award process for the project.

Mr. Marshall's knowledge of contracts and procurement has been a great benefit to the team. His ability to work with the project team and the contractors has helped to keep the project on track.
